Mr. Bob Silver  
General Technologies, Inc.

Dear Mr. Silver,

I thought you would like to learn of the good results that we have been having using Militec here at HCD. We have been using Militec-1 in our Savage Metal Cut Off Saw; prior to installing Militec-1 we were having frequent bearing problems in this piece of equipment. After adding Militec-1 we have not experienced any problems. The saw runs much quieter and cooler. We have also used Militec-1 in a 25 Ton Air Conditioning Unit Compressor; as you know Air Conditioning equipment is only expected to lower the Ambient temperature by 20-25o max. When we installed the Militec-1 into this compressor we found that we had 94o on one side of the coil and 59o on the other, this is a 35o degree drop across the coil and is a very significant increase in this units efficiency.

Our maintenance department crew is now going enthusiastically around looking for new equipment to try Militec-1. I don't know what better testimonial I can offer than this.

Sincerely,

/s/

Bob Vinson  
Maintenance Supervisor
